**COMPANY PROFILE**

# WHO WE ARE

**Cirtech Electronics is a leading printed circuit board (PCB) procurement company in Southern Africa, with over 25 years of sustained growth and experience.**

Over the years we have built a solid reputation for **quality products** across the board, as well as **excellent logistics** and **customer service**. We pride ourselves on our long-term relationships with our local and international customers, as well as our manufacturing partners.

**LEARN MORE** 

# WHAT WE DO

## Local convenience with global expertise.

Cirtech offers customers a complete, comprehensive and solution driven offering which results in quality PCBs, delivered to our customers anywhere in the world.

Our years of experience and expertise ensures that we are able to deliver to exact specifications, without 'unforeseen costs'.

# WHAT WE DO

Cirtech can fulfil all PCB needs, no matter the board specification, order or size requirements.

Cirtech is able to source PCBs and bespoke components from our partners and an extensive manufacturing network, all of which are **on-site audited and with whom we have long-standing relationships and preferential manufacturing agreements**. In addition, our large and established customer base allows us to achieve an economy of scales in manufacturing. We are also able to offer our customers **forward cover** as a solution to fluctuating import/export costs.

# WHAT WE DO

**Cirtech is an extension of your procurement team.**

At Cirtech our technical team offers exceptional product industrialisation expertise i.e. design for manufacturing (DFM), as well as oversight of production (production monitoring).

Due to our manufacturing relationships, we are also able to offer our customers **economy of scales in production**, thereby always ensuring compliant PCBs, no matter the specification, order or size. All manufacturing is conducted with certified and approved partners and we follow **strict data protection and integrity guidelines** throughout the supply chain.

# WHAT WE DO

## Cirtech supports your manufacturing process.

We offer all customers inventory management and **version control, with batch codes as well as PCB serialization if required.** Any order size is possible, including prototypes, preproduction and production runs. We also offer local stock holding and call-off orders.

Our technical and logistics team work closely with our customers to forecast and develop workable lead times, which in turn leads to improved **inventory management and cost savings.**

# WHAT WE DO

## **Cirtech aims to deliver on time.**

We pride ourselves on our agile logistics networks, which assists customers with accurate planning, inventory management and ensures we are able to manage global distribution. We offer consolidated freight management, which we have secured with our partners.

We are able to offer our customers preferential loading and are therefore able to deliver products to our customers earlier, which allows for faster release to market.

# WHAT WE DO

**Cirtech supports our customer's business beyond delivery.**

After delivering your PCB order to your factory, we ensure that we continue to provide you with **exceptional post-production support** and **full traceability** via our technical team. We have a comprehensive warranty and trade offering with the options of service level agreements (SLAs) for your account, project or part number. In addition, our dedicated **support team is available to directly assist** our customers, no call centre, and no ticketing system required! We also ensure customer management continuity through our **fully customised CRM and ERP system**.
